**District Governor  
James "Bud" McCune**

**Vice District Governor  
Melba Buado**

I would like to thank everyone that has had their Governor's night. It has been a very interesting and we have enjoyed the first six months. I just hope the last half will be as good as the first. I would like to say thanks to everyone that has brought in new members and reached their goal.

I would like to say to the Humble Lions Club that I am sorry I left their name off the announcement about the trailer for the camp in the newsletter.

There were six clubs that went in on the trailer: Houston Aldine, Houston Couples, East Lake Houston, Humble, Huffman, and Houston Spring Branch.

It is very good to have clubs working together. If we all work together the second half like we did the first we can have an outstanding year. Membership and New Clubs are a must if we are to reach our goals for the year.

When you look at the records, there are so many of us that have not brought in any new members in years.

I Wonder Why?

It takes everyone to work if we are to reach our goal.

One World, One Heart for a better Tomorrow.

I hope everyone had a Happy Hanukkah,

Merry Christmas and a Happy New Year and that

everyone will extend a helping hand to someone in need.

Sincerely, Your in Lionism

*J. E. McCune*

PHONE: 713-864-1615 ext 131

The Humble Lions Club is asking for help from each club in the district. I received a letter from Cheryl Holder a 43 yr. old lady with 2 children and a husband that works at night for help to get her a service dog. She is severely handicapped with multiple disabilities and is totally depended on other people. A service dog could help her out of bed, open doors, turn lights on/off, retrieve dropped or forgotten items and even get drinks from the refrigerator. We have found a dog in California for \$7,000. Which includes the trainer coming in Humble for several days. We have so far received \$1500. from a couple of clubs plus an outside source in Beaumont. We still need \$4,500. before going to HRF for additional funds. For more information please e-mail me at [tymewarp50s@hotmail.com](mailto:tymewarp50s@hotmail.com) and I will forward her letter that was sent to the club. Please let me know if your club can be of any assistance to this lady. Any amount will be appreciated. I have personally met with her and know of her needs. Thank you,

Ann Maxwell, President  
Humble Lions Club

# Global warming likely to hit Texas...

## Scientists say temperature rise change rainfall, Gulf Coast region

"GLOBAL WARMING IS TOO SLOW, DOC  
TAKE ME TO HAWAII"

Global warming will have serious long-term effects on the Texas Gulf Coast, possibly including more flooding, worse droughts and a diminishing supply of fresh water, according to a study released recently.

The two-year study, which was written by a team of 10 scientists with expertise in the entire region detailed the potential consequences over the next 50 to 100 years of higher temperatures and rising sea levels on the Gulf Coastal Plain from the Laguna Madre to the Florida Keys.

Climate changes will have important implications for the health and well-being of human populations as well as other goods and services that ecosystems provide to society.

The Gulf Coast region is disproportionately susceptible to changes in temperature and sea level. A small increase in temperature can result in a drastic rise in the July heat index; a small rise in sea level poses serious problems to a coastal region that is flat, overdeveloped and sinking.

The report, titled *Confronting Climate Change in the Gulf Coast Region*, accepts without debate that global warming is a real phenomenon. It assumes as fact that summer high temperatures are projected to rise between 3 and 7

degrees, and winter low temperatures will warm by as much as 5 degrees. It also assumes sea level will rise from will 18 to 20 inches, or from 15 inches to as much as 44 inches if ground subsidence is factored in.

All the scientists, as well as their forecasting models, agree precipitation will become more "uneven" and that extreme rainfall events, such as the flooding caused in the Houston area in June by the remnants of a tropical storm will occur more frequently.

In Texas the primary effect of climate change will be a reduction of fresh water supplies, necessary to both humans and the ecosystem, as salt water pushes further into coastal estuaries and wetlands, and evaporation increases off reservoirs and rivers.

Roger Zimmerman, the director of the National Marine Service Fisheries Laboratory in Galveston and also an author of the study, said Gulf Coast waters produce 1.9 billion pounds of fish, shrimp, crabs and other shellfish every year, worth about \$758 million. The fishery relies heavily on wetlands and estuaries for replenishment.

"These resources are vulnerable to climate change", Zimmerman said. "In the worst case, the wetlands are lost."

### Other possible consequences

- More frequent or longer lasting droughts;
- Greater damage from storms because of, among other things, higher sea level;
- A shift in the ranges of plant and animal species, and a more conducive environment for invasive species;
- Warmer temperatures will aggravate an already serious ground-level ozone problem in Houston and other coastal cities;
- A greater threat to public health from higher temperatures.

Clifton Heiman, Environmental Chairman
